SKILLS

Data Engineering & Warehousing

using Python and SQL

Big Data & ETL Processing

with Apache Spark, PySpark, and Delta Lake

Azure Cloud Data Engineering

using ADLS and Databricks

Batch & Streaming Pipelines

with Spark Structured Streaming and MySQL

EXPERIENCE

Data engineer intern

Stanch Electronics

05/10/2025 –

20/11/2025

- Worked on data ingestion and preprocessing using ADF and Databricks
- Assisted in building ETL pipelines for structured datasets
- Performed data cleaning, transformation, and validation tasks
- Used SQL queries for data analysis
- Supported automation of data handling workflows
- Gained hands-on exposure to real-world data engineering processes

PROJECTS

Netflix Data Engineering Pipeline (Azure + Databricks)

- Developed an end-to-end Azure Data Engineering pipeline using Medallion Architecture (Bronze, Silver, Gold) on Databricks with ADLS Gen2 storage.
- Ingested batch and incremental data using Azure Data Factory and Databricks Auto Loader for scalable and efficient data ingestion.
- Performed data cleansing, enrichment, and transformations using Delta Live Tables (DLT) with built-in data quality and validation rules.
- Designed optimized Gold layer datasets using Star Schema to support analytics and reporting use cases.

OBJECTIVE

Aspiring Data Engineer with strong hands-on experience in building end-to-end data pipelines using Python, SQL, Apache Spark, and Azure Databricks.

Experienced in ingesting, transforming, and optimizing large-scale data using Delta Lake and cloud storage.

Proficient in ETL workflows, data modeling, and performance optimization.

Seeking an entry-level Data Engineer role to apply analytical and cloud data skills in real-world projects.

EDUCATION

Electronics and Telecommunication

Sinhgad College of Engineering, Pune

2023 – 2026

Electronics and Telecommunication

Government Polytechnic Pune

2020 – 2023
